REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art fails to disclose, either singly or in combination, an apparatus for emitting radiant energy comprising an integrating cavity having an aperture for allowing emission of combined light; a plurality of light sources, each emitting light of a different wavelength, supplying light into the interior of the cavity; and control circuitry establishing output intensity of light of each of the sources to set a specific characteristic of the combined light emitted through the aperture of the cavity.

With respect to claim 32, the prior art fails to disclose, either singly or in combination, an apparatus for emitting light of multiple wavelengths comprising a plurality of first LEDs emitting light of first wavelength, at least one of the first LEDs being initially active and at least one other of the first LEDs being initially inactive; a plurality of second LEDs emitting light of second wavelength different from the first wavelength, at least one of the second LEDs being initially active and at least one other of the second LEDs being initially inactive; a controller operating the first and second LEDs; and a sensor arranged to sense at least one condition relating to the operation of the apparatus, wherein the controller selectively activates one or more of the inactive LEDs in response to the condition sensed by the sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
